

Electrical Safety Inspection Checklist

Chapter: *Basics of Electricity* Name: _____ Date: _____

Inspect your station and tools before use. Check each box only if it passes; mark and report any that fail.

<input type="checkbox"/>	All cords are intact - no fraying or exposed wire
<input type="checkbox"/>	Plugs are not cracked or loose
<input type="checkbox"/>	Outlets are not overloaded (not too many tools in one spot)
<input type="checkbox"/>	No cords or tools near water or wet areas
<input type="checkbox"/>	GFCI outlet present and working near sinks/shampoo bowls
<input type="checkbox"/>	Tools are held by the handle, not the cord
<input type="checkbox"/>	Walkways are clear of cords
<input type="checkbox"/>	Hands are dry before handling electrical tools
<input type="checkbox"/>	Heat tools are unplugged and cool before storing
<input type="checkbox"/>	Any damaged tool is removed from service
