

## Running the Student Clinic

*Chapter: The Student Clinic in Practice*

Balance learning and client service; hold the standard.

**Two goals** - Serve the student's learning AND the client's experience.

**Standards** - Same as a real salon - sanitation, quality, professionalism.

**Supervision** - Circulate; check work before, during, and after.

**When to step in** - For client safety; otherwise coach the student through it.

**Reputation** - A school's reputation lives on its clinic.

**Real-world prep** - Treat every clinic day as a rehearsal for their career.
