

Evaluation & Growth

Chapter: Evaluation & Growth

Reflect honestly, use feedback, keep growing.

Self-evaluation - Professional curiosity, not self-criticism.

Reflect - Did students learn the objective? What worked? What will I change?

Student feedback - Your best mirror - receive it openly.

Patterns - If many are confused at one point, the teaching is the issue.

Stay current - New techniques, products, and teaching methods.

Continuous improvement - The growth mindset applies to you, too.
